Application Responses

Section: Applying Entity Information

This question set collects information regarding the legal entity that would enter into a Registry Agreement with ICANN upon successful completion of all relevant application processes. The information collected is intended to be used for background screening.

AGB Q1. Full Legal Name

Provide the full legal name of the applying entity as it appears on the official registration documents. Do not use abbreviations.

Anthropic, PBC

AGB Q3. Legal Entity Form/Business Structure

Provide the long form (no acronyms) of the legal entity form/business structure of the applying entity as it appears on the official registration documents. If the original script of the legal entity form/business structure is not English, ONLY provide its official English translation. No additional information should be provided as this will be used for the automatic population of the Registry Agreement.

Public Benefit Corporation

AGB Q4. Jurisdiction

The jurisdiction indicates the location in which the business of the applying entity is registered for legal and financial purposes. This is either 1) a country name, or a 2) state/territory name, depending on where the applying entity is registered. No additional information should be provided as this will be used for the automatic population of the Base Registry Agreement. Examples include "Delaware", "Germany", etc.

Delaware

AGB Q10. Website URL

Provide the website URL of the applying entity, if available.

https://www.anthropic.com

AGB Q11. Is the applying entity an existing registry operator, ICANN accredited registrar, or an Affiliate of either?

1. Choose Yes or No.
2. Use the definition of Affiliate from the Base Registry Agreement (see https://www.icann.org/en/registry-agreements/base-agreement).

false

AGB Q13. Is the applying entity a back-end registry service provider (RSP), an ICANN-approved data escrow agent, an emergency back-end registry operator, a Uniform Rapid Suspension (URS) service provider, an ICANN dispute resolution service provider, a Privacy or Proxy Service Provider, or a Reseller?

Choose Yes or No.

false

AGB Q17. Phone Country Code

1

AGB Q18. Primary Business Phone

Provide the primary business phone number without including the country code.

(510) 255-0610

AGB Q19. Primary Business Email Address

Provide the primary business email address of the applying entity.

legal-corporate@anthropic.com

AGB Q20. Address Line 1

Enter the street address (no PO Box).

500 Howard Street

AGB Q22. Locality

Enter the city, village, municipality, etc.

San Francisco

AGB Q23. State/Province/Region

Enter the state, province, department, territory, prefecture, oblast, etc., if applicable.

California

AGB Q24. Postal Code

1. Enter the postal code, if applicable.
2. If a postal code does not exist, type "Not Applicable".

94105

AGB Q25. Country Code of Location

US

Section: Applying Entity Background and Organization

This question set collects information related to the individuals who will have access to TAMS, manage the application, and receive inquiries.

AGB 104. List all directors of the applying entity.

Dario Gabriele Amodei, Daniela Lily Amodei, Yasmin Razavi-Nematollahi, Wilmot Reed Hastings, Chris Pell Liddell, Vasant Kalathur Narasimhan

AGB 105. List all officers & partners of the applying entity.

Krishna Ajit Rao, Brian Robert Israel, Vitaly Gudanets, Patrick Azubike Ekeruo, Jared Daniel Kaplan, Dario Gabriele Amodei, Daniela Lily Amodei

Section: Self-Certification

Provide a single document for Self-Certification question Q4.2-1.
The document must include only the SC4.2-1.1, SC4.2-1.2, or SC4.2-1.3 statements.
Do not modify any of the Self-Certification statements.

AGB Q212. Q4.2-1 - Provide the applying entity's self-certification document, signed by the CEO, President, CFO and/or equivalent officer of the applying entity. If financial statements are provided by a Qualified Parent Entity (QPE), the CEO, President, CFO, and/or equivalent officer of the QPE must co-sign the certification document. The self-certification document must represent and warrant: SC4.2-1.1 - The applying entity and/or a QPE will fund the startup and long-term operation of all applied-for gTLD strings and (if applicable) currently operated gTLDs of a QPE. SC4.2-1.2 - The applying entity or QPE has at a minimum of US$50,000 plus 25% of the application base fee for each applied-for gTLD string in Cash and Cash Equivalents on the balance sheet of the provided financial statements, up to a maximum of US$300,000, designated to support the startup and operation of all of the applying entity's applied-for gTLD strings. SC4.2-1.3 - The applying entity and/or its officers are bound by law in its jurisdiction to represent financial statements accurately and the applying entity is in good standing in that jurisdiction.

1. Provide a single document for Self-Certification question Q4.2-1.
2. The document must include only the SC4.2-1.1 through SC4.2-1.3 statements.
3. Do not modify any of the Self-Certification statements.
4. If the applying entity cannot Self-Certify the SC4.2-1.1 through SC4.2-1.3 statements, provide a document that explains why the applying entity cannot Self-Certify the SC4.2-1.1 through SC4.2-1.3 statements.

Has Documents

Section: Security Policy and Planning

Provide a single document for Self-Certification question AGB Q220, Q5.1-1.
The document must include only the SC5.1-1.1 through SC5.1-1.3 statements.
Do not modify any of the Self-Certification statements.
If the applicant cannot Self-Certify SC5.1-1.1 through SC5.1-1.3 statements, provide a document that explains why the entity cannot Self-Certify the SC5.1-1.1 through SC5.1-1.3 statements.

AGB Q220. Q5.1-1 - Provide the applying entity's self-certification document, signed by the CEO, President, CFO and/or equivalent officer of the applying entity. The self-certification document must represent and warrant:
SC5.1-1.1 - The applying entity will appropriately protect confidentiality of data and prevent unauthorized access to data and services.
SC5.1-1.2 - The applying entity will maintain a mature, appropriately funded and staffed security program, following a recognized, modern security framework based on risk management (such as the ISO27000 series, COBIT, HITRUST CSF, legally required security frameworks, or equivalent). The security program must be in place prior to delegation, and exist through at least the period of the registry agreement.
SC5.1-1.3 - The applying entity is aware of and has designed its systems and business to comply with the relevant privacy and security regulations for all countries in which it operates.

1. Provide a single document for Self-Certification question Q5.1-1.
2. The document must include only the SC5.1-1.1 through SC5.1-1.3 statements.
3. Do not modify any of the Self-Certification statements.
4. If the applying entity cannot Self-Certify the SC5.1-1.1 through SC5.1-1.3 statements, provide a document that explains why the applying entity cannot Self-Certify the SC5.1-1.1 through SC5.1.1-3 statements.

Has Documents

Section: DNS Abuse

Provide a single document for Self-Certification question AGB Q221, Q5.2-1.
The document must include only the SC5.2-1.1 through SC5.2-1.7 statements.
Do not modify any of the Self-Certification statements.
If the applicant cannot Self-Certify the SC5.2-1.1 through SC5.2-1.7 statements, provide a document that explains why the applying entity cannot Self-Certify the SC5.2-1.1 through SC5.2-1.7 statements.

AGB Q221. Q5.2-1 - Provide the applying entity's self-certification document, signed by the CEO, President, CFO and/or equivalent officer of the applying entity. The self-certification document must represent and warrant:
SC5.2-1.1 - The applying entity will, no later than delegation of the Top Level Domain

(TLD), establish a dedicated abuse point of contact responsible for addressing matters requiring expedited attention and providing a timely response to abuse complaints concerning any name registered in the TLD.
SC5.2-1.2 - The applying entity will, no later than delegation of the TLD, establish, publish, and provide to ICANN the location of a mechanism for members of the public to submit reports of abuse in accordance with the current obligations of the Base RA and any Consensus Policies.
SC5.2-1.3 - The applying entity has developed proposed measures for removal of orphan glue records for names removed from the zone when provided with evidence in written form that the glue is present in connection with malicious conduct (see Specification 6).
SC5.2-1.4 - The applying entity has or will have at time of delegation, established policies for handling complaints regarding abuse. Such policies are to be maintained and posted publicly so that anyone can review the policies via the Internet and any other means deemed appropriate by the applying entity. The applying entity's policies at a minimum should contain appropriate confirmation of the receipt of the abuse report, the process of review of the report, and actions that will be taken if the applying entity confirms the report is legitimate.
SC5.2-1.5 - The applying entity understands that DNS Abuse is Phishing, Malware, Botnets, Pharming and Spam (when used to deliver other forms of DNS Abuse). The applying entity understands and is prepared to contribute to the mitigation or disruption of DNS Abuse in domains in the TLD zone.
SC5.2-1.6 - The applying entity's abuse response capabilities are resourced appropriately to ensure a timely and adequate investigation and response to reports of DNS Abuse. This includes capabilities to receive and evaluate evidence of DNS Abuse in reports, and to take action to stop or disrupt the DNS Abuse.
SC5.2-1.7 - The applying entity is prepared to conduct periodic scans of its zone to identify if domains are being used to perpetrate DNS Abuse, and to maintain statistical reports of the scans, the findings, and actions taken.

1. Provide a single document for Self-Certification question Q5.2-1.
2. The document must include only the SC5.2-1.1 through SC5.2-1.7 statements.
3. Do not modify any of the Self-Certification statements.
4. If the applying entity cannot Self-Certify the SC5.2-1.1 through SC5.2-1.7 statements, provide a document that explains why the applying entity cannot Self-Certify the SC5.2-1.1 through SC5.2-1.7 statements.

Has Documents

Section: Primary String

This question set collects basic information regarding the string that is being applied for (for example, a-label, meaning, script). If the applying entity opts to designate a replacement string, it must answer the same set of questions for the replacement string from the AGB Question Set 5 on.

AGB Q116. Applied-for Primary String (ASCII Label)

claude

AGB Q118. What is the meaning/definition of the applied-for gTLD string?

Provide the meaning, or restatement of the string in English, that is, a description of the literal meaning of the string in the opinion of the applying entity. If there is no literal meaning in English (for example, a brand name or a proper noun without a translation) simply state "No English Translation"

No English Translation

AGB Q120. Phonetic Representation

Provide a representation of the string according to the International Phonetic Alphabet.

/klɔːd/

AGB Q121. As per Section 3(d) of Specification 11 of the Base Registry Agreement, a registry operator of a "generic string" may not impose eligibility criteria for registering names in the TLD that limit registrations exclusively to a single person or entity and/or that person's or entity's "Affiliates" (as defined in Section 2.9(c) of the Registry Agreement). "Generic String" means a string consisting of a word or term that denominates or describes a general class of goods, services, groups, organizations or things, as opposed to distinguishing a specific brand of goods, services, groups, organizations or things from those of others. Confirm that the applied-for string is not a "generic string" in which the applying entity intends to limit registrations exclusively to a single person or entity.

Confirm the statement using a checkbox.

true

AGB Q133. What is the mission and purpose of the applied-for gTLD?

1. Describe the mission and purpose of the applied-for gTLD, including the intended registrants and users, and the related activities that have been or will be carried out to achieve this purpose.

1a. If applying for a variant of an existing gTLD, please also describe the mission and purpose of the existing gTLD, including the intended registrants and users, and the related activities that have been or will be carried out to achieve this purpose.

2. Explain how this purpose is sustainable over time.

Anthropic is an AI safety and research company. We are a Public Benefit Corporation whose purpose is the responsible development and maintenance of Advanced AI for the long-term benefit of humanity. We are working to build AI systems that are reliable, interpretable, and steerable. .CLAUDE, our own top-level domain, extends that purpose to how we show up online.

Names in .CLAUDE will be registered only by Anthropic, PBC, its affiliates, and partners it licenses to register under this gTLD. We'll use it to give the people who rely on us — our users, developers, researchers, and partners — a clear and trustworthy way to find what they need, by registering and operating addresses for our products, research,

documentation, careers, and developer resources (for example, about.claude, code.claude, or support.claude).
For us this is as much a safety matter as a branding one. Because only Anthropic and those it licenses can register an address here, anyone visiting a .CLAUDE site can trust it genuinely comes from Anthropic or a trusted partner — closing off one real avenue for the impersonation, phishing, and scams that misuse our name to mislead people.
And because .CLAUDE is used only by Anthropic and the partners we license, it doesn't depend on outside registrations to keep going. Anthropic funds and runs .CLAUDE as part of how we operate, and is committed to maintaining it for the entire term of the ICANN registry agreement.

Section: Safeguard Identification

This question set collects information related to determining whether certain Safeguard Public Interest Commitments (Safeguard PICs) are required for the applied-for gTLD string. See Section 7.8.2.3 Safeguard PICs. Answers to these questions will inform assessment by ICANN on whether and which Safeguard PICs must be incorporated in the applicable Registry Agreement (RA) if the string proceeds to delegation. The answers themselves will not automatically make such a determination.

AGB Q164. Will people see a domain name as more trustworthy because it is registered in your TLD?
Think about how people around the world will understand the TLD string(s) in the application, including literal and informal meanings in different languages and regions.

1. When answering the questions, apply criteria by considering the meaning of the requested TLD string in the following contexts:
a. Literally as described in the application
b. Literally in any other language in which the string is a recognized word or phrase.
c. Informally in any language or regional variant, where alternative meanings exist.
2. If the proverbial "reasonable person" who understands the relevant context believes that the question should be answered 'yes', then the answer is yes.

No

AGB Q165. Is it likely that consumers will face significant risks if domain names in the TLD(s) in the application are abused?
Think about how people around the world will understand the TLD string(s) in the application, including literal and informal meanings in different languages and regions.

1. When answering the questions, apply criteria by considering the meaning of the requested TLD string in the following contexts:
a. Literally as described in the application
b. Literally in any other language in which the string is a recognized word or phrase.
c. Informally in any language or regional variant, where alternative meanings exist.
2. If the proverbial "reasonable person" who understands the relevant context believes that the question should be answered 'yes', then the answer is yes.

No

AGB Q166. Would people generally think that this TLD will be used by entities that require strict licensing or accreditation to do business?
Think about how the TLD string(s) in the application will be understood around the world, including both literal and informal meanings in different languages and regions.

1. When answering the questions, apply criteria by considering the meaning of the requested TLD string in the following contexts:
a. Literally as described in the application
b. Literally in any other language in which the string is a recognized word or phrase.
c. Informally in any language or regional variant, where alternative meanings exist.
2. If the proverbial "reasonable person" who understands the relevant context believes that the question should be answered 'yes', then the answer is yes.

No

AGB Q167. Would most people think that (domains in) the TLD(s) in the application are used for activities that require regular government reporting, inspections, and oversight in various countries?
Think about how the TLD string(s) in the application will be understood around the world, including both literal and informal meanings in different languages and regions.

1. When answering the questions, apply criteria by considering the meaning of the requested TLD string in the following contexts:
a. Literally as described in the application
b. Literally in any other language in which the string is a recognized word or phrase.
c. Informally in any language or regional variant, where alternative meanings exist.
2. If the proverbial "reasonable person" who understands the relevant context believes that the question should be answered 'yes', then the answer is yes.

No

AGB Q168. Could people reasonably believe that (domains in) your TLD will cause or lead to harassment, harm, aggression, complaints, criticism, distress, or embarrassment?
Think about how the TLD string(s) in the application will be understood globally, including different languages and cultures.

1. When answering the questions, apply criteria by considering the meaning of the requested TLD string in the following contexts:
a. Literally as described in the application
b. Literally in any other language in which the string is a recognized word or phrase.
c. Informally in any language or regional variant, where alternative meanings exist.
I-2. If the proverbial "reasonable person" who understands the relevant context believes that the question should be answered 'yes', then the answer is yes.

No

AGB Q169. Would most people think that the TLD is used for something usually done by governments?
Think about how the TLD string(s) in the application will be understood globally, including different languages and cultures.

1. When answering the questions, apply criteria by considering the meaning of the requested TLD string in the following contexts:
a. Literally as described in the application
b. Literally in any other language in which the string is a recognized word or phrase.
c. Informally in any language or regional variant, where alternative meanings exist.
I-2. If the proverbial "reasonable person" who understands the relevant context believes that the question should be answered 'yes', then the answer is yes.

No

AGB Q170. Are you proposing to include one or more of the Safeguard Public Interest Commitments (Safeguard PICs) in the Registry Agreement (RA) voluntarily regardless of ICANN's Safeguard Assessment outcomes?

Select Yes or No.

Notes:
1. ICANN will evaluate whether an applied-for gTLD string requires one or more Safeguard Public Interest Commitments (Safeguard PICs) to be included in the Base RA).
2. In addition to the Mandatory Public Interest Commitments (PICs) that must be included in each Base RA, a subset of Base RAs must include Safeguard PICs based on ICANN's Safeguard Assessment. See Section 7.8.2.3 Safeguard PICs.
3. Applying entities for TLDs that are not found to require Safeguard PICs can elect to add them to the applicable Base RAs voluntarily to, for example, further their business objectives, help address issues or concerns that are raised or could be raised with respect to their applications, or avoid the need for the evaluation and implementation of customized Registry Voluntary Commitment (RVC). See Section 7.8.3 Registry Voluntary Commitments (RVCs).

No

Section: Registry Voluntary Commitments (RVCs)

This question set collects information related to any Registry Voluntary Commitments (RVCs) that the applying entity is submitting. The decision to submit an RVC is typically voluntary, except for those recognized by ICANN to resolve an objection or to address GAC Consensus Advice. See Section 7.8.3 Registry Voluntary Commitments for more information.

AGB Q172. Are you proposing to include one or more Registry Voluntary Commitments (RVCs) in the Registry Agreement (RA) that are unique to your applied-for string?

1. Select Yes or No.
2. In addition to Safeguard Public Interest Commitments (PICs), an applying entity will be permitted to propose one or more Registry Voluntary Commitments (RVCs) to provide additional safeguards with regard to the registry operator's operation of an applied-for gTLD string. See Section 7.8.3 Registry Voluntary Commitments (RVCs).
3. RVCs are separate from Community Registration Policies. See Section 7.8.3 Registry Voluntary Commitments (RVCs) and Section 7.8.4 Community Registration Policies for more information. If you are applying for a Community gTLD, please submit the Community Registration Policies by answering Questions 150-155. However, if you propose to include additional Registry Voluntary Commitments in the RA beyond the Community Registration Policies, you may answer "yes" and proceed to answer the following questions.
4. You are encouraged to consider whether there are other means, separate from including commitment(s) in the

Base RA, that could be used to further your business objectives or help resolve any anticipated or actual issue(s) raised regarding the applied-for gTLD string or application. See Section 7.8.3 Registry Voluntary Commitments (RVCs).

Notes:
If you select "yes" to this question, you are required to pay the conditional Registry Commitments Evaluation fee, and commitments that are approved by ICANN will be included in Specification 11 of the applicable Base RA as specific voluntary public interest commitments as contractual obligations.

No

Section: Brand & Code of Conduct Exemptions

This question set collects information related to whether the applied-for gTLD string is a .Brand (see Section 7.3) or if the applying entity is seeking a Code of Conduct exemption (see Section 7.4).

AGB Q179. Are you applying for a Brand TLD?

Select Yes or No

Yes

AGB Q180. The applying entity confirms that the applied-for gTLD string meets the Brand TLD criteria as described in Section 9.3 of Specification 13. The applying entity also confirms their understanding of contractual obligation to maintain Brand TLD status and communicate changes in registration policies that could potentially disqualify the TLD as a Brand TLD.

Select Yes or No. Notes: If the applying entity selects "no," it will be required to provide additional documentation describing which criteria is not met as well as a justification for the TLD to nonetheless qualify as a .Brand TLD.

Yes

AGB Q181. Submit Trademark Certificate

Attach an accurate and complete copy of the applicable trademark registration that forms the basis of the request for .Brand TLD qualification.

Has Documents

AGB Q183. The applying entity confirms that this applied-for string is not a "generic string" as defined in Section 3(d) of Specification 11 of the Base RA, which prohibits generic TLDs from being operated on an exclusive basis.

Confirm statement with a checkbox.

true

AGB Q184. No Specification 11 Conflicts

Explain how the applying entity intends to operate the TLD such that there would not exist any such conflict with Section 3(d) of Specification 11.

Applicant is committed to running the registry in full compliance with all applicable laws, consensus policies, reasonable and relevant best practice guidelines, binding RFCs and the Specifications of the Registry Agreement. Because all second level domain names under this registry will be registered for purposes which serve Applicant's strategic business aims, and are limited to the Applicant, its Affiliates, or Trademark Licensees

operating under a trademark license from the Applicant specifically allowing second level registrations, all use of the TLD will directly support Applicant's branding efforts for Applicant’s goods and services. No use will be made of the TLD in a way that denotes or describes a general class of goods or services or is otherwise a “generic” use of the term.

Section: Additional Information and Supporting Materials

This question set collects any additional information that the applying entity would like to provide, including any supporting materials.

AGB Q222. If the applying entity wishes to provide any additional information or supporting materials that the applying entity believes may be of interest to the public or relevant to the application, please include them here.

1. An applying entity may use this response field to submit any additional, optional information or documentation that the applying entity believes enhances understanding of its application or may be of interest to the general public. This could include, but is not limited to, the applying entity’s:
a) Individual registry policies;
b) Separate agreement with a third-party to fulfill certain commitments;
c) Terms of use;
d) Additional Community Registration Policies not intended for RA inclusion;
e) Other materials that clarify the applying entity’s mission, values, or intended use of the gTLD.

Notes:
1. This question is optional and for informational purposes only.
2. The information provided here will not be evaluated as part of the application, or be contractually binding on the applying entity.
3. All submissions to this question will be posted for the public to review and comment.

COMMENTS ON QUESTIONS 164 - 169:
The .CLAUDE top-level domain is a brand TLD operated by Anthropic, PBC. Domain names within this TLD may be registered only by Anthropic, its affiliates, and its authorized licensees; it is not open to the general public.
Because Anthropic is an established brand, people may reasonably regard a .CLAUDE address as trustworthy. As the only party (along with its affiliates and authorized licensees) that can register domain names within the TLD .CLAUDE, Anthropic is well positioned to operate a trusted namespace. The particular mechanisms for public accountability that an affirmative response to Questions 164-169 would initiate address risks that arise from third-party registration of domain names within generic term gTLDs corresponding to highly regulated or higher-risk sectors (e.g. .kids, .finance, .law, etc.) and are not applicable to a closed brand TLD such as .CLAUDE, whose only domain registrants are Anthropic and those it authorizes. Regulation in Anthropic’s industry sector continues to evolve, and Anthropic will remain in dialogue with ICANN on any future potential public accountability measures that serve the global public interest.

Section: Bona Fide Intent and Prohibited Communications

This question set contains attestations related to the applying entity's acknowledgment of bona fide intent and prohibited communications.

AGB Q223. By submitting this Application, the applying entity confirms that it is submitting this Application with a good faith ("bona fide") intent to operate the gTLD for which it has applied, and that the applying entity has read and understands the provisions of Section 5.2.3.1 Prohibited Communications and Activities of the Applicant Guidebook regarding the New gTLD Program rules prohibiting certain communications and activities to prevent parties from privately resolving string contention among themselves.

Confirm the statement using the checkbox.

true

AGB Q224. By submitting this Application, the applying entity confirms that it has read and understands the provisions of Section 5.2.3.1 Prohibited Communications and Activities of the Applicant Guidebook regarding the New gTLD Program rules prohibiting certain communications and activities to prevent parties from privately resolving string contention among themselves.

Confirm the statement using the checkbox.

true

Objections

Objections for this Application have not yet been published. Information will be added when it becomes available. Please check back periodically for updates.

Response Documents

Section: Self-Certification

AGB Q212. Q4.2-1 - Provide the applying entity's self-certification document, signed by the CEO, President, CFO and/or equivalent officer of the applying entity. If financial statements are provided by a Qualified Parent Entity (QPE), the CEO, President, CFO, and/or equivalent officer of the QPE must co-sign the certification document. The self-certification document must represent and warrant: SC4.2-1.1 - The applying entity and/or a QPE will fund the startup and long-term operation of all applied-for gTLD strings and (if applicable) currently operated gTLDs of a QPE. SC4.2-1.2 - The applying entity or QPE has at a minimum of US$50,000 plus 25% of the application base fee for each applied-for gTLD string in Cash and Cash Equivalents on the balance sheet of the provided financial statements, up to a maximum of US$300,000, designated to support the startup and operation of all of the applying entity's

applied-for gTLD strings. SC4.2-1.3 - The applying entity and/or its officers are bound by law in its jurisdiction to represent financial statements accurately and the applying entity is in good standing in that jurisdiction.

Section: DNS Abuse

AGB Q221. Q5.2-1 - Provide the applying entity's self-certification document, signed by the CEO, President, CFO and/or equivalent officer of the applying entity. The self-certification document must represent and warrant:
SC5.2-1.1 - The applying entity will, no later than delegation of the Top Level Domain (TLD), establish a dedicated abuse point of contact responsible for addressing matters requiring expedited attention and providing a timely response to abuse

complaints concerning any name registered in the TLD.
SC5.2-1.2 - The applying entity will, no later than delegation of the TLD, establish, publish, and provide to ICANN the location of a mechanism for members of the public to submit reports of abuse in accordance with the current obligations of the Base RA and any Consensus Policies.
SC5.2-1.3 - The applying entity has developed proposed measures for removal of orphan glue records for names removed from the zone when provided with evidence in written form that the glue is present in connection with malicious conduct (see Specification 6).
SC5.2-1.4 - The applying entity has or will have at time of delegation, established policies for handling complaints regarding abuse. Such policies are to be maintained and posted publicly so that anyone can review the policies via the Internet and any other means deemed appropriate by the applying entity. The applying entity's policies at a minimum should contain appropriate confirmation of the receipt of the abuse report, the process of review of the report, and actions that will be taken if the applying entity confirms the report is legitimate.
SC5.2-1.5 - The applying entity understands that DNS Abuse is Phishing, Malware, Botnets, Pharming and Spam (when used to deliver other forms of DNS Abuse). The applying entity understands and is prepared to contribute to the mitigation or disruption of DNS Abuse in domains in the TLD zone.
SC5.2-1.6 - The applying entity's abuse response capabilities are resourced appropriately to ensure a timely and adequate investigation and response to reports of DNS Abuse. This includes capabilities to receive and evaluate evidence of DNS Abuse in reports, and to take action to stop or disrupt the DNS Abuse.
SC5.2-1.7 - The applying entity is prepared to conduct periodic scans of its zone to identify if domains are being used to perpetrate DNS Abuse, and to maintain statistical reports of the scans, the findings, and actions taken.
